Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Oku (US 5,276,080), newly cited.

Note column 5 (line 45) to column 6 (line 20), column 7 (lines 55-63), column 9 (lines 55-64) and the paragraph bridging column 10 (line 58) to column 11 (line 17).

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yoshinaka et al (US 5,310,598), newly cited.

Note column 2 (lines 4-10), the paragraph bridging column 2 to column 3, the paragraph bridging column 3 to column 4, column 6 (line 35) to column 7 (line 2) and the many Examples.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shimasaki et al (US 5,498,654), newly cited.

Note the Abstract, column 3 (lines 23-35) and column 4 (lines 40-49).

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yamamoto et al (US 5,988,891), newly cited.

Note the Abstract, column 4 (lines 33-52), column 5 (lines 29-44), column 5 (line 45) to column 7 (line 27).

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Sato et al (US 6,675,770), newly cited.

Note column 3 (lines 29-41), column 5 (lines 1-15 and 44-54), the paragraph bridging column 5 to column 6, the paragraph bridging column 11 to column 12, column 13 (lines 35-43) and column 14 (lines 29-44 and 50-56) and the Examples.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yoshinaka et al (US 5,183,594), newly cited.

The reference to Yoshinaka et al teaches the production of a resin composition that may comprise a tetrafluoroethylene polymer at column 12 (lines 38-53) with zinc oxide whiskers having a tetrapodal shape with particulate and fibrous filler materials including talc, glass fiber, copper, zinc oxide, graphite, etc.. Note column 13 (lines 35-43) and column 14 (lines 29-44). Note the paragraph bridging column 11 to column 12, column 14 (lines 50-56) and the Examples for the compositional limitations that overlap with those recited herein. Note the paragraph bridging column 8 to column 9. The reference shows the contemplated sizes for the zinc oxide whiskers, as recited herein, at the paragraph bridging column 11 to column 12, and teaches the benefits of size. This suggestion is sufficient to establish a size range for the particulate and other fibrous materials as added herein. As such, the instant claims are deemed to be at least obvious, if not anticipated, by the teachings of the reference to Yoshinaka et al.
